

1MW Solar Energy Storage Unit in Nigeria

Overview

This solar and storage hybrid mini-grid provides reliable electricity to nearly 2,000 households, hundreds of commercial users, and public facilities, supporting the socio-economic development of the community. At the United Nations House in Abuja, EM-ONE Energy Solutions deployed a modular solar microgrid featuring 400 kWp of PV and 650 kWh of lithium battery storage. Beyond diesel displacement, the project signals a deeper shift: global institutions operating in Nigeria now assume decentralised. The project, configured with 334 kW of solar PV and 1 MW/2 MWh of energy storage, was successfully deployed in a community in Plateau State by the Federal Government through the World Bank Africa-funded Nigeria Electrification Project (PBG). Kano 1 MW Interconnected Mini-grid - Photo credit ©EM-ONE EM-ONE successfully commissioned a 1 MW solar power plant. The solar hybrid mini-grid project, located in Ogun State, Nigeria, was designed to address the chronic power supply challenges faced by this underserved region. With a total photovoltaic (PV) capacity of 1.2 MWp and an AC power output of 1 MW, the system is supported by a robust 1.7 MWh ATESS. ESS Tech Inc (NYSE:GWH), a US manufacturer of long-duration energy storage systems (LDES), on Tuesday said it will provide an initial 1 MW/8 MWh of storage to Nigerian energy company Sapele Power Plc.
