

Bogota electricity market trends

Overview

Large-scale green-hydrogen pilots, a USD 40 billion transition plan, and ISA Intercolombia's grid-modernisation drive further reinforce growth, while heightened digitalization accelerates residential and commercial loads. Colombia's electricity market, valued at \$764.65 million in 2024, is projected for significant expansion, exhibiting a CAGR of 8. This growth is primarily driven by escalating energy demands from a burgeoning population and a developing industrial sector. This expansion is driven primarily by increasing energy demand fueled by economic growth and urbanization, coupled with a. Subscriptions starting at \$199 USD /year The chart above illustrates Colombia's energy consumption from January 2022 to January 2025. 3% rise compared to the preceding month. Credit: Ministry of Mines and Energy. Colombia is again staring into an energy supply crossroads: More than three decades after a nationwide power crisis forced rationing.
