

# Cape town reduced carbon emissions

## Overview

Thus, the City of Cape Town has a climate-change strategy which aims at reducing the vulnerability of the municipality area to impacts of climate change and which includes more urban greening, improved water supply, action to reduce storm damage, reduction of fire. Thus, the City of Cape Town has a climate-change strategy which aims at reducing the vulnerability of the municipality area to impacts of climate change and which includes more urban greening, improved water supply, action to reduce storm damage, reduction of fire. ncreasingly carbon neutral-focused world. Significant changes will be necessary to achieve this. As such, this strategy provides a framework for the City of Cape Town ('City') to transform the way it engages and operates, and to ensure alignment of key City policies, strategies and plan with. The GHG Protocol Corporate Accounting and Reporting Standard methodology approach was adopted in order to compile the inventory and report based on Scope 1 and Scope 2 GHG emissions attributable to the construction and operational activities undertaken by the Water Strategy. The calculated carbon. Cape Town Mayor Geordin Hill-Lewis has announced the successful auction of R36m in carbon credits generated by reducing gas emissions at City landfill sites via waste-to-energy initiatives. These funds will be ring-fenced for Urban Waste Management projects to reduce pollution and improve. This will put society on a path towards realising the globally unified 1.5-Degree Lifestyles target of 2.5°C above pre-industrial levels. Based on an assessment of consumption data across. te Change Monitoring and Evaluation systems have been evolving over the recent past.
