

Do you install the photovoltaic panels yourself or with a company

Overview

Most states allow homeowners to install solar panels themselves, provided they obtain proper permits, follow local building codes, and pass required inspections. However, any electrical connections to the power grid must typically be completed by a licensed electrician. Clicking “Get Your Estimate” submits your data to All Star Pros, which will process your data in accordance with the All Star Pros Privacy Policy. Do-it-yourself (DIY) solar panels. It's a solar panel setup that you can buy and install by yourself, rather than having a solar panel company install your system. However, DIY solar panels are rarely the best decision for a home, and may not be worth it for financial, legal, or. A do-it-yourself (DIY) solar panel installation may be tempting, but it could cost you more in the long run. This installation method isn't without its challenges, but.
