

Electric vehicle infrastructure colombia

Overview

In 2019, Colombia published Law 1964, establishing public sector heavy-duty vehicle electrification targets, electric vehicle (EV) charging infrastructure targets in 15 cities, and various fiscal incentives targeted toward EV owners. With its increasing commitment to sustainability and reducing carbon emissions, Colombia is laying the groundwork for a greener, more eco-friendly future. The development of EVs. Scenario 266 is based on the COP21 emissions-reduction target (266 million tons by 2030) as well as the targets outlined in the green growth plans of Colombia's National Council of Economic and Social Policy, which foresee 600,000 EVs in the country by 2030. Colombia is the third Latin American country after Chile and Uruguay to commit to work towards all new sales of cars and vans being zero emission by 2035. Colombia is. Sales of electric vehicles in Colombia reached a record high in October, with an annual increase of 97. Credit: EEYAUT Waihung, CC BY-SA 4.
