

# Fuye Solar Power Generation

## Overview

On December 27, 2023, China's largest single-unit floating PV power project connected to the grid in Fuyang, Anhui Province. Built by CTG, the project boasts a total installed capacity of 650 MW, featuring 1.2 million solar modules, 85.95% of the total electricity consumption in Suzhou, surpassing the Fuyang Group's target of using 10% green energy by 2025. After thorough preparation, the fusing a solar panel array is crucial for system safety, but not every setup requires a fuse. The decision to fuse a solar panel array depends largely on the size and configuration of your solar panels and the electrical characteristics of your system. It is situated in the city of Fuyang and spans 867 hectares, equal to the size of 1300 football fields. The solar farm is built on a flooded region, which was. Recently, the Anhui Fuyang Southern Wind-solar-storage Base (hereinafter referred to as Fuyang Base Project), which is supplied by DAS Solar, achieved full-capacity grid-connected power generation for the 250 MW photovoltaic project in Phase 1.
