

How to install the photovoltaic support pole bracket

High Voltage Solar Battery

Overview

Center the arm on the back of the panel as shown and position the clamps under the edges of the module's flange. Thread each hose clamp through one of the sets of narrow center holes and place the bracket on the pole as shown. Insert another bolt and flat washer from the inside. To attach the upright bracket to the upright bracket, you can use the upright bracket and attach using bolts (panel should have slots). Lay the PV Module protected flat surface. Installations also must comply with local building regulations and permitting requirements. We recommend consulting a professional. The mounting kit is easy to install. If you need assistance at any point in your installation or have suggestions on how we can improve your experience, call customer support at 1-800-819-7236 Ext 556 or email us at support@proton-engineering.com. To ensure the smooth installation of photovoltaic system brackets and meet design requirements, Guidance Method For The Installation Of PV System Brackets are provided, including ground-mounted, rooftop, adjustable tilt angle, floating, Building-Integrated Photovoltaics (BIPV), bifacial, and.
