

Huawei's fast charging cost with energy storage

Overview

4 cents per kWh – the same as the 100kW charging points at other carparks within the campus. [SINGAPORE, 6 Feb 2026] – Huawei and SP Mobility have launched Singapore's first ultra-fast electric vehicle (EV) charging enabled with battery energy storage system (BESS), at Temasek Polytechnic. The launch event. Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra-fast charging in just five minutes. The development signals a significant push by the tech giant to stake a claim in. A 400kW ultra-fast EV charger, launched in Tampines, can add 300km range in 10 minutes, costing 77. Huawei plans to deploy similar ultra-fast charging. Capable of serving up to 700 electric heavy trucks per day, it is expected to deliver more than 300,000 kWh of charging daily. This technology boasts a peak power of 1.
