

Hungarian high solar container system manufacturer

Overview

LZY Solar Containers use proprietary folding panel technology to maximize power generation while maintaining standard shipping dimensions. Our systems are faster to deploy, generate more power than traditional solutions, and integrate seamlessly with existing infrastructure. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container. Greensolar is a specialized distributor of solar panels for utility-scale photovoltaic power plants and offers solutions for residential projects. All above our solar products have been approved by the TUV, TCT, CE, UL for EU and US standards. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. ROTTERDAM - 21 May 2024 - Crushing its original 2030 solar target six years early, Hungary has doubled its ambitions and is aiming for 12 GW of PV capacity by the end of the decade.
