

Jakarta new energy battery site

Overview

Singaporean renewable energy developer Aslan Energy Capital has penned a new deal with Indonesia's Jakarta Industrial Estate Pulogadung (JIEP) to develop a 40MW data centre with a 120MWh battery energy storage system (BESS). The facility is expected to be operational by the fourth. Indonesia is making significant progress toward renewable energy integration, targeting an ambitious 75 GW addition by 2040. Using battery storage with solar. As Southeast Asia's first grid-scale lithium-ion battery project (capacity: 200 MWh), it's like giving the city a giant rechargeable battery the size of 20 football fields. This isn't your smartphone's power bank. The Indonesian government has joined forces with a consortium led by South Korean multinational electronics company LG to fast-track the establishment of a factory for manufacturing electric vehicle (EV) battery cells and associated facilities, entailing a substantial investment of \$9.9 billion, an Indonesian official said on Sunday (Jun 29). The plant is expected to expand to produce electric vehicle batteries with.
