

Largest containerized power generation

Overview

JENBACH, Austria / HOUSTON, U. – October 21, 2025 – INNIO Group today announced the largest order by power delivery in its history: a groundbreaking 2.3 GW power infrastructure project featuring 92 power packs, each delivering 25 MW of output. That is why earlier this month, Cummins Power Generation expanded the release of their fully integrated containerized generator sets Centum™ Force, to serve 50Hz markets around the world. Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for. Atlas Copco has launched its largest container energy storage system (ESS) in the prime power market – the ZBC 1000-1200 – which delivers 1MW of power output and 1.2MWh energy capacity from a single unit. The new ZBC 1000-1200 is built using the same advanced and trusted battery technology as Atlas. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user. Leveraging the expertise acquired during several decades with more than 3,000 containerized units delivered, our genset containers offer optimal performance in various site conditions. By maintaining. *Revolutionary 50MWh BESS cuts land use by 45% and redefines grid-scale storage with liquid-cooled SiC tech* HEFEI, China — Global energy solutions leader Sungrow has launched the PowerTitan 3.
