

Latest news on energy storage container policy

Overview

Despite actions in Washington targeting clean energy, over 600 GWh of energy storage is expected to be installed by 2030. This rapid deployment will help lower energy costs, enhance reliability, and boost American energy independence. Latest top stories INTERVIEW - Sonnen aims at 11. 2 GWh of VPP capacity in US, Canada about 1 hour ago Plug Power abandons NY project, to sell terrain to data centre firm about 6 hours ago Europe tops 300 GW of wind capacity after 19 GW added in 2025 1 day ago Growing module sales boost First. Energy Storage Summit 2026 finished yesterday, having brought the industry together for its first major meeting of the year. Utility Xcel Energy. BloombergNEF projects worldwide battery storage installations to reach 100 gigawatts by the end of 2025 and more than double within a year as costs continue to fall. China leads the expansion, surpassing 100 gigawatts of new-energy storage capacity in 2025 - more than doubling output in just twelve. China's largest vanadium flow battery energy storage project has been fully commissioned, marking a major milestone in the application of large-scale, long-duration energy storage technologies, China Three Gorges Corporation said on January 2.
