

# New energy storage units in the United States

## Overview

Two-thirds of all utility scale energy storage capacity installed in 2025 was built in states won by President Donald Trump, including 9 of the top 15 states for new installations. Texas is set to overtake California in 2026 as the largest energy storage market in the country. Despite actions in Washington targeting clean energy, energy storage installations grew 30% from the previous. Battery Storage in the United States: An Update on Market Trends This battery storage update includes summary data and visualizations on the capacity of large-scale battery storage systems by region and ownership type, battery storage co-located systems, applications served by battery storage. Explore the largest battery storage projects in the US and see all the utility-scale battery projects in the US on a map. Michael is the CEO of Cleanview. Energy storage installations grew 30% from the previous record set in 2024, and are over four-times what the industry installed just three years ago. A. Houston/WASHINGTON, D. 6 gigawatts (GW) of installations, according to the latest U.

## Article Content

U.S. Energy Storage Hits Record 57.6 GWh In 2025, A 30% Increase ...

The U.S. energy storage industry achieved a record-breaking milestone in 2025, installing 57.6 gigawatt-hours of new capacity—the largest single-year addition of battery storage on record. ...

US Energy Storage Installations Reach New Quarterly Record in Q2 with 5 ...

California and New York led Q2 CCI storage installations, accounting for over 70% of total capacity, while Illinois ...

Top 7 Battery Energy Storage System (BESS) Projects in the USA 2026

Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.

Report: U.S. adds 58 GWh of new energy storage capacity in 2025

The U.S. energy storage industry installed a record-breaking 57.6 GWh of new capacity in 2025. It marked the largest single year of new battery capacity additions on record. Despite actions ...

US utility-scale energy storage to double, reach 65 GW ...

Utility-scale battery storage in the United States is poised to more than double over the next two years and will close out 2026 at nearly 65 GW — ...

SEIA: US installed 57.6 GWh of new energy storage capacity in 2025

Two-thirds of all utility-scale energy storage capacity installed in 2025 was built in states won by President Donald Trump, including nine of the top 15 states for new installations. Texas is set ...

US Battery Storage Project Map

Interactive map of battery storage projects in the US. View the largest projects, track new developments, and explore capacity data across all states.

U.S. Adds 58 GWh of New Energy Storage Capacity in 2025

Despite actions in Washington targeting clean energy, over 600 GWh of energy storage is expected to be installed by 2030. This rapid deployment will help lower energy costs, enhance ...
