

# Photovoltaic panel export customs clearance flow chart

## Overview

Photovoltaic (PV) systems should be classified under heading 8501 based on their output current type, specifically subheadings 85017 for DC systems and 85018 for AC systems. To be specific, the classification of components declared separately for import or export shall be determined by. Crystalline Silicon Photovoltaic (CSPV) Cells and Modules as specified in Presidential Proclamation 10339 of February 4, 2022. February 7, 2025, through February 6, 2026. For CSPV cells, an annual aggregate quantity of 12. August 12, 2024: FRN 2024-18444 authorized expansion of the. Correct classification not only affects customs clearance efficiency but also relates to tax rebates and costs. Today, let's talk about the key points of classification for photovoltaic equipment and common components to help you avoid common pitfalls and make exporting smoother. Photovoltaic. This guide dives into the critical steps of photovoltaic panel export and cabinet loading, offering actionable insights for suppliers, installers, and project developers. We'll explore emerging trends, tackle common logistics challenges, and reveal why proper cabinet loading can make or break your. tainable energy. We understand that Renewable Energy (RE) and Energy Efficiency (EE) technolo-gies are essential for a brighter future - powering homes and businesses, creating jobs, protecting our environment, and fulfilling Nigeria's commitments like the Energy es into Nigeria.
