

Photovoltaic panels price rise

Overview

Wood Mackenzie's October 2025 analysis confirms that PV module prices are jumping approximately 9% in Q4 2025, with further increases expected through 2026. It represents a structural market correction that will reshape solar procurement strategies. From April 2026, China will scrap VAT rebates on solar exports. China has confirmed that it will eliminate value-added tax. In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry. The Chinese Module Marker (CMM), OPIS's benchmark for TOPCon modules $\geq 600\text{W}$, rose 1. Credit: CFOTO/Future Publishing via Getty Images 'An Unlikely Coalition' Failed to Expand Rooftop Solar in Wyoming. China's VAT rebate reduction, polysilicon consolidation, and lower factory utilization are reshaping the market. To protect margins, lock in pricing early, diversify suppliers, and adopt high-efficiency HPBC and ABC modules. Smart. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market.
