

Solar industry laos

Overview

Laos is looking to move away from coal-based power generation, with a focus on renewables development, especially onshore wind and solar PV. The southern region of the country, encompassing the provinces of Sekong, Attapeu, and Champasak, boasts significant wind energy. In a significant stride for renewable energy in Southeast Asia, Northern Laos officially launched its largest solar power project on December 13. This landmark initiative represents a major boost to the region's green energy capacity and underscores the growing momentum behind utility-scale solar.

Geographical Location: Laos is a landlocked country in Southeast Asia, bordered by China to the north, Vietnam to the east, Cambodia to the south, Thailand to the west, and Myanmar to the northwest. Onshore wind power and solar PV are expected to drive growth in Laos' renewable power capacity. Credit: Allexandar via Shutterstock.

GlobalData's latest. The Laos government signed a concession agreement with CGN Laos Taven Power Sole Co. for the construction of Phase I of a 1,000 megawatt (MW) solar farm in the northern districts of Xay and Namor, Oudomxay province.
