

Solar panels and home power supply

2MW / 5MWh
Customizable

Overview

Whether or not you can power your entire home with solar energy will depend on a few different factors. Here are the 3 most important questions you'll need to answer first: 1. How much electricity do you generally use?

2. How much sunlight does your home get?

3. How much space do you have for solar panels on your roof. Everybody's answer to this question will be different. How much electricity you normally use can depend on lots of things – like: 1. How big the house is 2. How many people live there 3. Whether you use gas, or just electricity. Contrary to what you might think from looking at our grey skies, here in the UK we do have enough sunlight for solar power! The Met Office has worked out these average figures, to give you an idea of how much sunlight we get. So, now you know how much electricity you need, and how much sun you're likely to get. The final question remains: how many panels will you need to power your home, and do you have space for them?

To answer this, we need.

Article Content

How many solar panels do you need to power a UK ...

Do solar panels need direct sunlight to work? Not necessarily! Solar panels can produce power even on cloudy days. In fact, even if it's snowing or hailing, as long as there's some light, your solar panels can generate ...
