

The lowest price in history for photovoltaic panels

Overview

The median price for solar-only systems dropped to \$2.65 per watt in the second half of 2024, down from \$2. In this article, we'll take a deep dive into eight major historical solar panel price drops, look at the events and trends that caused them, and explore how those same factors might keep driving prices lower. And yes — I'll back it up with real examples, market analysis, and even a few surprises. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Residential solar prices are falling lower than ever before, said marketplace operator EnergySage in its biannual solar and storage marketplace report. 9400 and is last updated on 24 February 2026. Popular questions about solar panel prices: Why are solar panel prices fluctuating?

Which variables impact the price of a solar panel?

Where do solar panels come from?

Solar panels are about 60% cheaper and 40% more efficient than they were in 2010. Solar panels in 2010 cost about \$8. We are witnessing a significant reduction in the cost of one of the most important green technologies – by almost.
