

The price of installing a 5000w solar power system

Overview

On average, a 5 kW solar panel system costs \$13,550, according to real-world quotes on the EnergySage Marketplace from 2025 data. Why trust EnergySage?

How much does a 5 kW solar system cost?

How much electricity will a 5 kW solar system produce?

Where can you purchase a 5 kW solar system?

Is a 5 kW solar system right for you?

If. How much does 5000w solar photovoltaic cost?

The price of a 5000-watt solar photovoltaic system can vary significantly based on several influencing factors. Average costs range between \$12,000 and \$22,000, depending on geographical location, installation complexity, and brand quality. With prices ranging from \$11,000 to \$15,000 before incentives, 5kW solar kits have become increasingly popular due to their balance of power output, space requirements, and return on investment. After applying the 30% federal Investment Tax Credit (ITC), your effective cost drops to \$7,700-\$10,500. You've probably heard solar is "affordable" now, but when you see quotes for a 5000w solar power system ranging from \$11,000 to \$17,000, it makes you wonder: Why such a big price gap?

Let's break down what you're really paying for. 2024 Solar Cost Drivers: What's Ch...
